

Dear Customer,

We would like to inform you of an important component availability update concerning the product you have received, which incorporates a Sony 2 MP image sensor.

Sony has discontinued the production of its 2 MP rolling-shutter sensors. We were formally notified of this End-of-Life (EOL) decision on September 8, 2026. Sony has also confirmed that no Last Time Buy (LTB) opportunity will be available for these sensors.

The following Sony sensors are affected:

IMX290, IMX291, IMX327, IMX307, IMX462 and IMX662.

This impacts the following skoopia products:

board SDI: 21C14S, 21C26S, 21C42S

board AHD: 21C26AT

board IP: 21C26IP6, 21C42IP6, 21C42IP2, H21C42IP6

zoom blocks: 20Z10S-NF3, 21Z10S, 21Z10H, 21Z30S, 21Z30H

We understand the potential impact this may have on your business and are actively working on a solution to ensure continuity. Skoopia expects to have pin-to-pin compatible replacement solutions, with the same sensor size, available by the end of 2026.

Our objective is to provide a seamless transition and minimize any disruption to your ongoing business.

Due to the discontinuation of Sony sensors, products based on these sensors will be available on a first-come, first-served basis, while supplies last. Existing customers will be given priority and informed first.

We will keep you informed of further developments and provide additional details as soon as the replacement solutions are available.

We sincerely apologize for any inconvenience this unexpected component discontinuation may cause and appreciate your understanding and continued trust in Skoopia.

Kind regards,

Yves Wintraecken -CMTO
